Activating: Monitoring, Evaluation and Assessment (MEA)
Strengthening co-learning

Siegel's "Bayesian" approach

- **(Prior) Before:** What are we testing? What our assumptions do we need to consider?
- **(Evidence) During:** What evidence are we gathering?
- **(Posterior) After:** What have we learned? How have we revised our assumptions and perspective on what change is needed?

Our Principles

- Root in inquiry questions
- Define success as "what we learned," even from perceived "failure"
- Generate insights usable by others, not just us
- Tailor methodology and evidence to grantee, strategy, and learning questions
